Java

```java
class Solution {
  public int minOperations(String s) {

  }
}
```

JavaScript

```javascript
/**
 * @param {string} s
 * @return {number}
 */
var minOperations = function(s) {

};
```

TypeScript

```typescript
function minOperations(s: string): number {

};
```

C++

```cpp
class Solution {
public:
```

```
  int minOperations(string s) {

  }
};
```

C#

```
public class Solution {
  public int MinOperations(string s) {

  }
}
```

Kotlin

```
class Solution {
  fun minOperations(s: String): Int {

  }
}
```

Go

```
func minOperations(s string) int {

}
```
